

Survey evaluation results

Dear,

In this report you find the evaluation results for the Data Analysis Techniques module evaluation survey.

To provide a visual aid to help differentiate between results, traffic light 'indicators' have been incorporated into the report which show to the right of the histograms. They provide a quick view of the average student response to each question, which could be used as an indicator of where to focus attention.

The median score is also included for each question in the report.

The scale on which students scored their views is as follows:

- 4 = To a large extent
- 3 = To some extent
- 2 = To a small extent
- 1 = Not at all

Also included in the report are the free text comments for the module.

Please do provide all students on the module with a response detailing key points from the feedback on the module and any actions planned as a result of it.

Best wishes

Survey Results

Legend

Question text

n=No. of responses
av.=Mean
md=Median
dev.=Std. Dev.
ab.=Abstention

Description of quality symbol

Mean value is below the quality guideline.

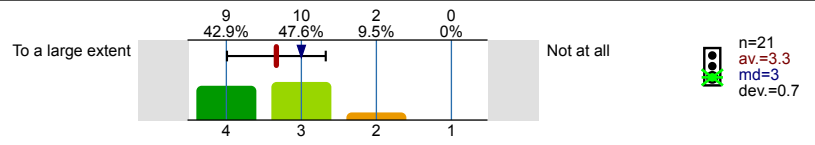

Mean is within the range of tolerance for the quality guideline.

Mean value is within the quality guideline.

2. Data Analysis Techniques - Module Evaluation

2.1)	To what extent does the teaching on this module help you to understand the content?	To a large extent	10 47.6% 10 47.6% 1 4.8% 0 0% 4 3 2 1	Not at all	n=21 av.=3.4 md=3 dev.=0.6
2.2)	To what extent is the Canvas site on this module well-organised? For example, if relevant, are lecture slides uploaded and easy to find? Is the module content easy to navigate?	To a large extent	19 90.5% 2 9.5% 0 0% 0 0% 4 3 2 1	Not at all	n=21 av.=3.9 md=4 dev.=0.3
2.3)	To what extent do you understand how you ... be assessed for this module? For example, are marking criteria and guidance about your assessments available?	To a large extent	13 68.4% 5 26.3% 1 5.3% 0 0% 4 3 2 1	Not at all	n=19 av.=3.6 md=4 dev.=0.6 ab.=2
2.4)	To what extent does the University provide the right learning resources for this module? For example, Library resources (such as reading lists), IT services.	To a large extent	13 61.9% 8 38.1% 0 0% 0 0% 4 3 2 1	Not at all	n=21 av.=3.6 md=4 dev.=0.5
2.5)	To what extent does this module help you feel part of a learning community? For example, does the module help you to engage with other students?	To a large extent	10 50% 6 30% 3 15% 1 5% 4 3 2 1	Not at all	n=20 av.=3.3 md=3.5 dev.=0.9 ab.=1
2.6)	To what extent does this module offer you opportunities to develop practical skills or knowledge that ... benefit your future career or studies?	To a large extent	14 66.7% 5 23.8% 2 9.5% 0 0% 4 3 2 1	Not at all	n=21 av.=3.6 md=4 dev.=0.7
2.7)	To what extent do you understand how generative AI ..., or cannot, be used to support your assessment in this module?	To a large extent	11 52.4% 6 28.6% 2 9.5% 2 9.5% 4 3 2 1	Not at all	n=21 av.=3.2 md=4 dev.=1

2.8) To what extent were you satisfied with this module?

Comments Report

2. Data Analysis Techniques - Module Evaluation

2.9) **Please use this space to tell us 1-3 things that you valued about the teaching and learning on this module.**

- Covered all the basics of statistics. Really loved it.
- Hybrid learning
Coursework
Workshop
- I think the teaching is good and engaging
- Lecturer is a great teacher who's teaching style matches very well with my learning style
- Practical examples of statistical models, review of PDFs and their application, continual references to the code necessary to apply what is being taught
- Teaching is always relevant to other areas of study and is always open for further questions and discussion.
- This module was instrumental in learning how to apply mathematical concepts in a real-world scenario. I feel that the module does a good job bridging the gap between the theory and the real-world through workshops and assignments.

2.10) **Please use this space to tell us 1-3 things that could be improved the next time this module runs.**

- Lecture time
Assignment
Course Materials
- Lecture timetabling could be better (a 5 pm lecture does not lend itself well to being able to pay full attention)
- Spend less time on statistical background to leave more space for inference techniques and their application
- The content in this module, especially for lectures, tends to overwhelm the students with too much maths. By this, I mean that lectures slides would often contain descriptions of mathematical formulas and the instructor would go over the formulas. But, at these points, I felt that there was a disconnect between the theory and its applications and was wondering why am I learning this particular topic. Another point is that certain topics are given little attention. The instructor mentions these topics in a single slide but there is not much learning material for these topics. Finally, the marking feedback for the assignments could be improved as it's difficult to understand the feedback even after contacting the person doing the marking.
- The lecture times make it a little difficult to be fully focused.
